Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Winter Storm Activity, Santa Barbara County (Initial / Final)

On Sunday, 02/25/18, at approximately 1900 hours the Santa Barbara County Office of Emergency Management (OEM) issued a pre-evacuation advisory for residents in the Thomas, Sherpa, and Whittier burn areas along the Santa Barbara South Coast area for tonight, 02/26/18, through Tuesday morning, 02/27/18, due to the forecast of impending precipitation.

- A storm is predicted to arrive late this afternoon and continue into tomorrow with a slight chance of heavier thunderstorms that could cause 0.50 – 1.00 inches of precipitation.
- Residents have been advised to closely monitor the situation and prepare for the possibility of evacuation.
- No shelters have been opened at this time.
- Per the Cal OES Southern Duty Officer at 0814 hours, the National Weather Service has provided a forecast that indicates the storm will proceed over land which will reduce the threat of adverse conditions significantly.
- Cal OES Duty Officers have been advised and are monitoring and providing updates as warranted.

Telecommunications System, Cal OES Southern Region (Updated)

On 02/26/18, Cal OES Southern Region had pre-planned network maintenance at the base. As a result; all lines, data , phone and internet will be inoperable today, 02/26/18 through Tuesday, 02/27/18. Contractors, Cal OES Information Technology (Cal OES IT) and Tactical Communication (T-Comm) are either on site or have been advised and are addressing the issue.

- Alternate communications methods were tested and are in place should the Cal OES Regional Emergency Operations Center (Cal OES REOC) warrant activation.
- The Cal OES Southern Duty Officer (Cal OES SDO) and Information Technology Duty Officer (Cal OES TDO) are monitoring and providing updates as they become available.

WEATHER OF CONCERN

Weather of Concern

- Another cold storm system will sweep through California tonight into Tuesday, 02/27/18. This system is expected to produce low elevation snows and wet conditions for portions of mountain and valley locations.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

There will be a series of cold, wet weather systems move through the region over the next week and likely beyond that. The first system is moving through the region today and has brought some precipitation to all areas. There will be a dry, somewhat warmer break between systems Tuesday followed by a stronger cold system arriving Wednesday and lasting into the weekend. Conditions over the weekend will be more showery with precipitation decreasing.

There will also be a chance of some thunderstorms, mainly late this week. There will be some periods of gusty winds this week too, starting with northerly winds today and Tuesday, then becoming southerly Wednesday into Thursday with lighter northerly winds over the weekend. The strongest gusts will mostly be 25-35 mph, but gusts to around 40 mph will be possible locally too.

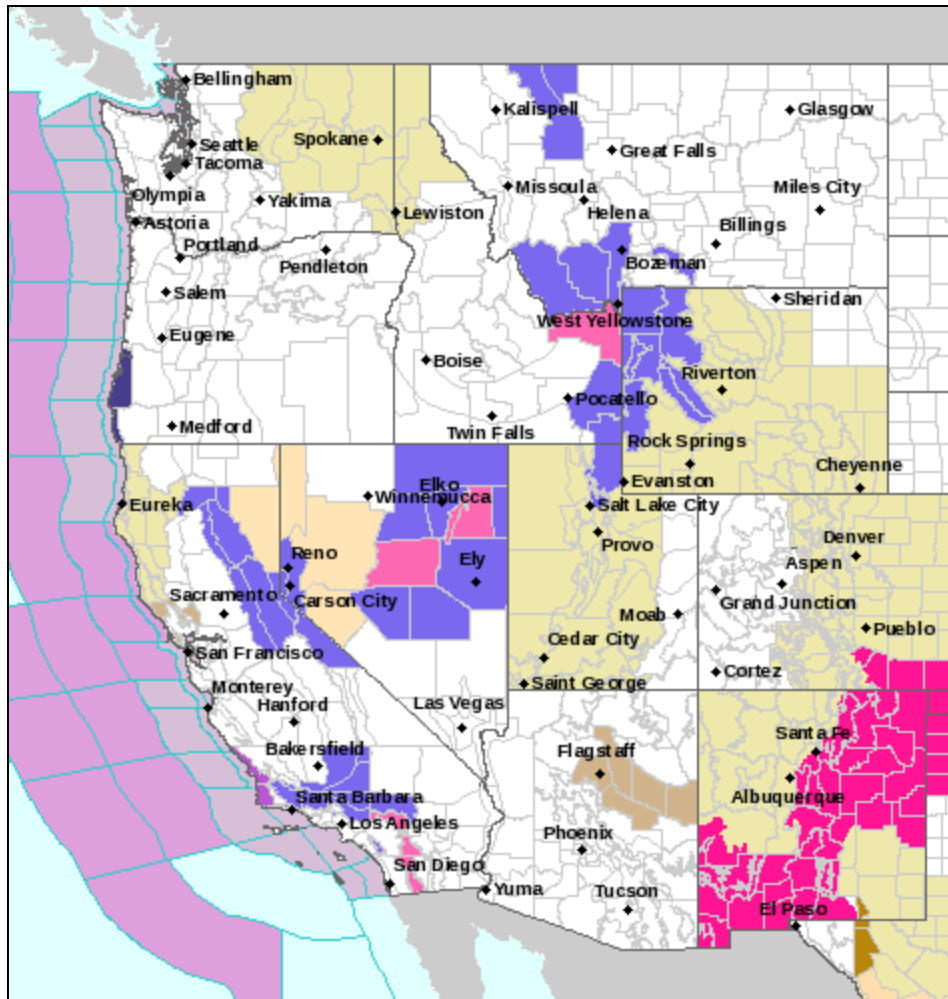

Snow levels will be rather low this week, as low as 1000-1500 ft in the north at times to 2500-3000 ft in the south. This will make for some winter driving conditions over many of the mountain pass roads this week. It seems likely that the lower elevation passes could see 3-6 inches of snow on the road with around 10 inches, locally more on the higher elevation roads. Temperatures will remain below normal and at least 10 degrees below seasonal values later this week.

SOUTHERN CALIFORNIA

A storm moving south from the Pacific Northwest will bring scattered showers to Central California through tonight and scattered showers to the region tonight through Tuesday afternoon. Most locations will receive less than a half inch of rainfall, but some mountain locations will receive up to an inch of rainfall. The snow level will be around 3,000 feet. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas this afternoon through Tuesday morning. Significant cooling will occur through Tuesday. Maximum temperatures will be in the mid 30s to mid 40s across the mountains and 50s to low 60s in the valleys today, with upper 20s and 30s across the mountains and mid 40s to mid 50s in the valleys Tuesday. There will be a break in storms Wednesday causing temperatures to warm a few degrees and winds to become light. Another storm will bring showers to Central California starting Thursday morning and to the region starting Thursday night. Showers with this storm will continue through Saturday. This storm looks to be a little wetter than our recent storms, with most locations expected to receive between a half inch and an inch of rainfall. However, the Central Sierra and the Big Sur Coast will likely receive between 1 and 3 inches of rainfall. The snow level will be around 5,000 feet with this storm. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Thursday afternoon through Saturday. Temperatures will continue to be well below normal Thursday through Saturday. A weak ridge of high pressure will build into California from the Pacific Ocean causing temperatures to warm to near normal and winds to become light across the region Sunday through early next week.
